

Mixed Migration Futures: How might climate-related events and environmental stressors drive migration in 2035 in West and North Africa?

Date: 27th October 2021

Place: Zoom https://icmpd.zoom.us/j/99919131098 /meeting ID: 999 1913 1098

Time: 14:00-15:45 (CET/ Brussels time)

14:35 – 14:50 Introduction to the MMC-ICMPD migration futures partnership, Rabat Process Secretariat and MMC 14:20 – 14:35 What is the link? The state-of-the-art on environmental change and migration outcomes. What do we know and what don't we know? MMC Outcome: participants familiar with the latest research on the effects of climate-related events and environmental stressors on migration, and the primary migration outcomes: immobility, internal displacement and international movements. What does 4Mi data reveal about how people on the move experience environmental factors as drivers of movement? MMC Outcome: participants receive latest 4Mi data from West and North Africa as it relates to environmental drivers. The data reveals insights into how people on the move perceive environmental stressors within their movement decision-making. 14:50 – 15:05 A new conceptual framework on environmental change and migration: mobility, immobility, capability to stay MMC Outcome: participants introduced to new conceptual framework
14:15 – 14:20 Introduction to the workshop theme and how it features in scenario-planning, MMC What is the link? The state-of-the-art on environmental change and migration outcomes. What do we know and what don't we know? MMC Outcome: participants familiar with the latest research on the effects of climate-related events and environmental stressors on migration, and the primary migration outcomes: immobility, internal displacement and international movements. What does 4Mi data reveal about how people on the move experience environmental factors as drivers of movement? MMC Outcome: participants receive latest 4Mi data from West and North Africa as it relates to environmental drivers. The data reveals insights into how people on the move perceive environmental stressors within their movement decision-making. 14:50 – 15:05 A new conceptual framework on environmental change and migration: mobility, immobility, capability to stay MMC Outcome: participants introduced to new conceptual framework

movement decision-making. 14:50 – 15:05 A new conceptual framework on environmental change and migration: mobility, immobility, capability to stay MMC Outcome: participants introduced to new conceptual framework
14:50 – 15:05 A new conceptual framework on environmental change and migration: mobility, immobility, capability to stay MMC Outcome: participants introduced to new conceptual framework
migration: mobility, immobility, capability to stay MMC Outcome: participants introduced to new conceptual framework
<u>Outcome</u> : participants introduced to new conceptual framework
developed by MMC on environmental drivers of movement, and its
application to a selected number of case studies in West Africa.
15:10 – 15:25 Implications for policy: resilience, circular migration, rural-to-urban
mobility, and cross border movements. MMC
Outcome : participants understand priority policy areas for future migration
policy-making and planning emerging from MMC's conceptual framework.
15:25 – 15:40 Facilitated discussion with all participants <i>MMC</i>
What are key environmental drivers you have seen in your countries
and what environmental drivers are you preparing for over the next
10-15 years?
How do your current migration policies integrate or take into
consideration environmental factors as drivers of migration?

Project funded by the European Union

In the framework of the Support Programme to the Africa-EU Migration and Mobility Dialogue (MMD)

	 What do you see as the main challenges and priorities within this area of policy?
	What role should/could international cooperation play?
15.40-15.45	Closing and next steps – Rabat Process Secretariat
