**MTM i-Map Layer on Migration and Development: Infographic 'Migrant Entrepreneurship'**

The infographic on Migrant Entrepreneurship is an output of the Migration and Development (M&D) layer of the intergovernmental information exchange project Interactive Map on Migration in Africa, the Middle East, and the Mediterranean Region (MTM i-Map 2011-2014), implemented in the framework of the Dialogue on Mediterranean Transit Migration (MTM), gathering officials from Algeria, Egypt, Ethiopia, 27 EU Member States, Ghana, Kenya, Lebanon, Libya, Mali, Morocco, Niger, Nigeria, Norway, Senegal, Switzerland, Syria, Tunisia, and Turkey.

It is widely acknowledged that migrants have the potential to contribute to development, both in their countries of origin and in their countries of destination. Entrepreneurship is one possibility for migrants to do so. The decision to start an enterprise depends on factors related to the migrant's cultural and personal predisposition as well as to the regulatory and business environment of the country. These factors influence the type of enterprise set up and its location, either in the country of origin or destination, and some have a specific impact on migrants. Public actors of countries of origin or destination can offer targeted incentives that create a more favourable regulatory and business environment for migrant entrepreneurs.

This infographic provides a visual overview on factors impacting on migrant entrepreneurship and policy options in this field.
